## LEGEND

- PAVEMENT
- BRIDGES
- PAVEMENT REMOVAL
- RETAINING WALL

Phase 1 as shown in this slide has an estimated completion date of June 2021. This phase will provide an I-16 EB C-D road between I-75 and Spring Street, including detour/pedestrian bridge over the river, portions of the viaduct bridge, and the EB C-D bridge over Spring Street. It will also construct a permanent eastbound ramp to Spring Street, widen the I-16 EB exit ramp to Coliseum Drive to two lanes and reconfigure the intersection with Coliseum Drive to accommodate dual left and right turn lanes from the exit ramp, and add a left turn lane to I-16 westbound from northbound Spring Street.
